**Dynamic Fluid Products Inc.
Parker Transair Distributorship Announcement**

Dynamic Fluid Products Inc. is pleased to announce that we are now a Parker approved distributor of the Transair Advanced Piping product line.

In conjunction with our service and TSSA approved installation capabilities, the Parker Transair product line allows us to provide our customers additional cost effective options to become more efficient.

Transair is a fast, flexible and easy to modify aluminum pipe system for compressed air applications. Quick connections eliminate the need to thread and solder pipe. The lightweight aluminum pipe is easy to handle and safe to work with on elevated platforms. Transair offers significant savings on installation, maintenance and operating costs, making it a cost effective and efficient piping option.

Transair Benefits:

- Energy efficient
- Lower installation costs
- Quick connect technology
- Immediate pressurization
- Removable and reusable
- Modular design
- No corrosion
- Resists mineral and synthetic compressor oils, aggressive environments, mechanical shocks, compressor oil carry over, thermal variations, ultraviolet

For more information or to schedule an appointment please contact your local Sales Representative or:
Chuck Collins – Service Manager – ccollins@dynamicfluid.com

We look forward to hearing from you.

Thank you,
The Staff at Dynamic Fluid Products Inc.
